

<b>FIRST PARTY COOKIES SET BY THE DEC</b>		
Site	Cookie Name	What does it do?
dec.org.uk	SESS...	This is a session cookie, used to track logged-in status. The cookie name is usually suffixed with a random ID. Eg. SESS1234abc
dec.org.uk	NO_CACHE	This cookie holds cache lifetime information for users' browsers. The shorter the cache lifetime, the more frequently your browser will request page content from the server. For example, rather than saving a particular image on the page every time you visit the page, the browser will only re-download that image once the period specified by this cookie has elapsed. The value held in this cookie overwrites any other cache lifetime settings of content on the site.

<b>THIRD PARTY COOKIES</b>		
Site	Cookie Name	What does it do?
google.co.uk	__utma, __utmb, __utmc, __utmz	This is a Google Analytics cookie. It's used to track user activity on the site. The cookie domain is actually www.dec.org.uk, but as the code that sets it is from google.com, it's a third party cookie. This contains anonymised information on links, buttons clicked on the site, what pages have been visited and for how long.

Flickr.com	localization	This cookie stores the users' language settings for Flickr.
Yahoo.com	B	A tracking cookie for Yahoo. This cookie is related to Flickr
YouTube.com	VISITOR_INFO1_LIVE Use_hitbox	These cookies are used by YouTube to track usage of its services

<b>THIRD PARTY AND BROWSER-SET COOKIES</b>		
Site	Cookie Name	What does it do?
google.co.uk	Nid  Pref	Google tracking and safe browsing cookies. Google's NID and PREF cookies are set by browsers to protect users against known intrusive sites. If you arrive at one of these sites it allows your browser to take action or notify you. Users can stop these cookies being set by turning off their browser's 'safe browsing' mode.
Twitter.com	__utma, __utmb, __utmc, __utmz,  __utmv	Cookies set by Twitter's analytics. Used to track user activity on the twitter site. This contains information on links, buttons clicked on the site, what pages have been visited and for how long.
Twitter.com	_twitter_sess	Session cookie used to track logged in status
Twitter.com	External_referrer	Cookie tracking the immediate referrer to Twitter. In this case, the referrer will be

		www.dec.org.uk
Twitter.com	Guest_id	Session cookie used to track non-logged-in users' settings
Twitter.com	Original_referer	Cookie containing information on the original referrer. This will be the site you originally came from; in this case, www.dec.org.uk
Facebook.com	Datr	Facebook tracking cookie to track login attempts
Facebook.com	Lsd	Facebook authentication cookie
Facebook.com	Reg_ext_ref	Cookie tracking the immediate referrer to Facebook. In this case, the referrer will be www.dec.org.uk
Facebook.com	Reg_fb_gate	Tracking cookie Facebook sets when you arrive at a login page for Facebook tracking functionality
Facebook.com	Reg_fb_ref	Cookie containing internal Facebook referrers
Facebook.com	wd	A cookie set by Facebook, needed for Facebook use. It is not a known invasive or unsafe cookie
